

# Create interactive learning and meeting experiences

Get the most out of your i3BOARD with:

## i3PROJECTOR Lamp

This interactive projector allows you to **transform any surface** into an interactive whiteboard. The ultra-short-throw makes sure that **you don't get blinded** by the lamp.

## i3PROJECTOR Laser

An easy & maintenance-free interactive projector. **No hassle** with replacing lamps. The ultra-short-throw makes sure that **you don't get blinded** by the laser light.

## i3LEARNHUB

Our cloud based collaborative learning platform that allows teachers to **prepare and share lessons** with students anywhere, anytime. **Shortlisted as best Educational app at BETT Show 2018!**

## AR tools for i3LEARNHUB

Make your math class interactive with our **augmented reality** tools. We offer **recognisable tools** such as a **compass, set square and ruler** for easy use on the interactive whiteboard.

## i3ANNOTATE

Easy & intuitive annotation software with a **simple interface** and **limited tool set** to draw over any desktop application with digital ink. Scribble notes or make sketches on the board & save them **simply as a jpg** file.

## Warranty

Standard: 3 years - after registration: 5 years. Lifetime warranty on ceramic steel surface.

# i3BOARD

*Interactive whiteboard*

### In the classroom

it is a challenge to capture students' attention and keep them focussed during lessons. An interactive whiteboard helps **make lessons more dynamic** and to personally engage students in learning activities.

### In the meeting room

it is not always easy to keep all participants engaged in meetings. An interactive whiteboard allows you to involve **multiple users who can contribute** with views and ideas in real-time.

### This is why having an i3BOARD is great

#### Multi-touch interaction

The i3BOARD has **multi-touch technology** that recognises 20 touch points allowing multiple users to collaborate on the same surface. **Split the screen in multiple screens** and allow multiple student activities.

#### Dual writing

The i3BOARD has a surface made of **durable ceramic steel** that allows you to write with **both wet and dry** erase markers – this is what we call **dual writing**. The surface can also be used as a projection screen, as it **reduces reflection from natural light** and leaves no marks from erasing.

#### Up to 135 inch

i3BOARD is available in a **135 inch format**. It has a large screen to **ensure perfect visibility** from a long distance, and a large work surface to collaborate and interact with multiple users.

### Features overview

#### Shape recognition

The multi-touch technology tracks touches intuitively and accurately. It recognises touch size and the shape of pens, fingers, augmented reality tools and other solid objects.

#### Augmented reality

Combine traditional measurement tools with digital technology. Use the compass, set square and ruler on the i3BOARD to make geometry exercises easier to understand for your students.

#### V-Sense technology

This technology uses sensors in the full frame of the display to detect touch even if dust or other objects are obstructing portions of the frame.

#### 20 touch points

The i3BOARD has a multi-touch technology that recognises 20 touch points simultaneously.

#### Dual writing

The i3BOARD has a surface made of durable ceramic steel that allows you to write with both wet and dry erase markers.

#### Up to 135 inch

i3BOARD is available in a 77", 87", 100" and 135 inch format.

### Next to interactive boards, we also offer touch displays. **How to choose?**

Criteria	Your requirements	Best choice
Size	A large working surface	i3BOARD Sizes range from 77" to 135"
	A smaller surface	i3TOUCH Sizes range from 55" to 86"
Image quality	Image quality is less important	i3BOARD Depends on projector
	I want state of the art sharpness	i3TOUCH High resolution images
Maintenance	I can plan time for maintenance	i3BOARD Re-calibration necessary
	I want no maintenance	i3TOUCH No re-calibration needed
Writing	Write analogue & digital	i3BOARD Markers, stylus or finger
	Digital writing only	i3TOUCH Write with finger or stylus
Price	Low purchase price	i3BOARD Low TCO
	Higher purchase price	i3TOUCH Low TCO
