

NEW!

LARGE LARGER LARGE LARGER LARGE LARGER LARGE LARGER

We are proud to introduce new and larger Euroscreen® screen solutions on the AV market;

Diplomat Flex & Access Flex

New production conditions in our plant in Halmstad, Sweden, give us the opportunity to offer you the Diplomat Flex and Access Flex projection screens in sizes up to 600 cm width. The viewing surface is an elastic white front projection material with a gain of 1.0. In an ultimate neat way, the surface is welded either horizontally or vertically to match desired formats and sizes, leaving an almost invisible weld.

The Diplomat Flex is electric with cylindrical shaped cassette in white aluminium, equipped with sturdy brackets. Several control options are available ; AutoLink, IR or RF remote control. The Access Flex case for recessed ceiling installations offer the possibility to install the case first and screen later. Both models are available in projection formats 1:1 and 4:3 without black borders.

- Up to 600 cm width
- Elastic white front screen surface
- Neat, almost invisible weld
- White cylindrical case or recessed ceiling case

Diplomat Flex electric
