CONTROL OPTIONS

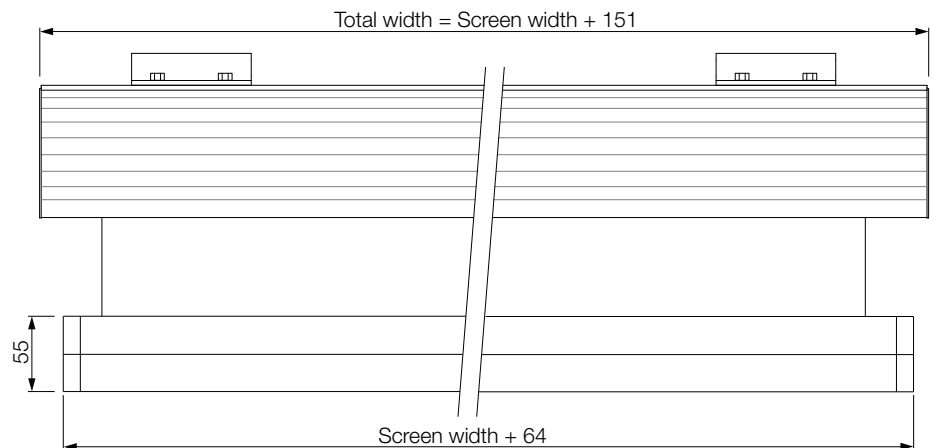

Installation

3m cable. Needs to be installed by electrician.

Diplomat Flex is a very robust high quality screen in large sizes. The installation is very flexible with mounting brackets that can be adjusted sideways to preferred positions. The screen can be mounted on the wall as well as in the ceiling. It comes in a white aluminium case and with three meter cable. Due to the thin screen surface used, the screen becomes very slim in it's appearance even in sizes up to 6m wide. The surface is welded either horizontally or vertically to match desired formats and sizes, leaving an almost invisible weld and screen surface presents great surface flatness.
