- RF remote control included
- RF wall transmitter

Euroscreen® Sesame 2.1 is an upgrade from the award winning, sophisticated recessed projection screen designed for installation in suspended or plastered ceilings. The model has a clever design of the bottom dowel which closes the case flush when the screen is not used, and the white aluminium case is equipped with unique removable end flanges for quick access and installation. The distinctive feature with a concealed drop function of screen section allows for installation in prepared ceiling cut-out later on during the construction process. The screen is stylish in its appearance with external flange profiles which are integrated with the case. Optional brackets for trouble-free installation in recessed ceilings are available.

SCREEN DIMENSIONS

Considerations regarding cut out width

Minimum cut out width: screen width + 305

Maximum cut out width: screen width + 343

Recommended cut out width: screen width + 325

CASE DIMENSIONS

BRACKET DIMENSIONS

Brackets are included in all Sesame products.
